

PROJECT ABSTRACT

KindConnect – NGO & Local Volunteer Finder

1. Problem Statement (Existing System)

Many NGOs and charitable organizations depend on volunteers to conduct social activities, awareness programs, and community services. However, volunteer recruitment is often carried out through social media, phone calls, or personal contacts, making the process slow and unorganized. Interested volunteers also face difficulty in finding nearby NGOs and suitable volunteering opportunities. The absence of a centralized platform leads to poor communication, delayed responses, and inefficient volunteer management.

2. Objective

The objective of KindConnect is to develop a centralized platform that connects NGOs with local volunteers. The system allows volunteers to register, create their profiles, and apply for volunteer opportunities based on their interests and availability. NGOs can review volunteer applications and recruit suitable candidates for various events and activities. The platform aims to simplify volunteer management, improve communication, and encourage greater community participation.

3. Proposed Solution

KindConnect is a mobile application that enables NGOs to register their organizations, create volunteering events, and publish volunteer requirements. Volunteers can create profiles by providing their name, phone number, address, age, skills, interests, availability, and emergency contact details. They can browse nearby NGOs and submit requests to join organizations or participate in specific events. NGOs can review applications, approve or reject volunteers, and communicate with selected candidates. Admin manages NGOs, volunteers, events, approvals, and reports through a centralized dashboard. Notifications keep users informed about application status, event updates, and volunteer schedules.

4. Technology Stack

Component	Technology
Frontend (Mobile)	Flutter
Backend	Node.js + Express.js
Database	PostgreSQL
Image Storage	Cloudinary
Authentication	JWT (JSON Web Token)
Notifications	Firebase Cloud Messaging (FCM)

5. Benefits of the Project

- Simplifies volunteer recruitment for NGOs.
- Connects volunteers with nearby organizations and events.
- Reduces manual communication and paperwork.
- Maintains organized volunteer records digitally.
- Encourages community participation and social service.

MODULE DESCRIPTION

Admin

- Manage NGOs
 - Verify NGO registrations
 - Manage Volunteers
 - Manage Events
 - View Reports
 - Handle Complaints
 - Manage Categories
-

NGO

- Register/Login
 - Create Organization Profile
 - Post Volunteer Opportunities
 - Create Events
 - Review Volunteer Applications
 - Approve/Reject Volunteers
 - Manage Volunteers
-

Volunteer

- Register/Login
 - Create Profile
 - Add Skills & Interests
 - Upload Profile Photo
 - Browse NGOs
 - Browse Volunteer Events
 - Apply to Join NGOs
 - Apply for Events
 - View Application Status
 - Receive Notifications
-
-

Main Modules

1. Authentication Module
2. NGO Management
3. Volunteer Management
4. Event Management
5. Volunteer Application System
6. Skill & Interest Management
7. Notifications
8. Reports & Analytics
9. Admin Dashboard

Total Modules: 9
