

PROJECT ABSTRACT

LastBite – Restaurant Closing Time Deals Portal

1. Problem Statement (Existing System)

Many restaurants and bakeries are left with unsold food items at the end of the day. These items are often discarded despite being safe for consumption, leading to food wastage and financial loss. Customers are usually unaware of available discounts before closing hours. Existing food delivery platforms mainly focus on regular ordering and do not specifically address the problem of reducing food waste through end-of-day deals. A dedicated system for connecting restaurants with customers interested in discounted closing-time offers is lacking.

2. Objective

The objective of LastBite is to create a platform that helps restaurants sell unsold food items before closing time. The system allows restaurants to publish special discounts on available items and enables customers to discover and reserve these offers. The platform aims to reduce food wastage, increase restaurant revenue, and provide affordable food options to customers. It also improves communication between restaurants and local consumers.

3. Proposed Solution

LastBite is a web and mobile application that allows restaurants to post discounted food items available near closing time. Restaurants can update food details, quantity, discount percentage, and offer expiry time. Customers can browse nearby restaurants, view available deals, and reserve food items by providing their name and phone number. The system displays restaurant closing times and highlights active offers. Customers receive notifications when new deals are posted. Admin manages restaurants, customers, deals, bookings, and reports through a centralized dashboard. The platform helps reduce food waste while creating value for both restaurants and customers.

4. Technology Stack

Component	Technology
Frontend (Mobile)	Flutter
Backend	Node.js + Express.js
Database	PostgreSQL
Image Storage	Cloudinary
Authentication	JWT (JSON Web Token)
Notifications	Firebase Cloud Messaging (FCM)

5. Benefits of the Project

- Reduces food wastage.
- Helps restaurants generate additional revenue.
- Provides affordable food options for customers.
- Promotes sustainable food consumption.
- Improves customer engagement with local restaurants.

MODULE DESCRIPTION

Admin

- Manage Restaurants
 - Manage Customers
 - Manage Deals
 - View Reports
 - Handle Complaints
-

Restaurant

- Register/Login
- Add Food Deals
- Set Closing Time
- Manage Reservations
- Update Deal Status

Customer

- Register/Login
 - Browse Deals
 - View Restaurant Details
 - Reserve Food
 - View Booking Status
-

Main Modules

1. Authentication Module
2. Restaurant Management
3. Customer Management
4. Deal Management
5. Reservation System
6. Restaurant Closing Time Management
7. Reports & Analytics with notification
8. Admin Dashboard

Total Modules: 8
